EXAMINER'S AMENDMENT

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 28 April 2005 has been entered.

Information Disclosure Statement

2. The information disclosure statement filed 28 April 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein pertaining to the Alan Simpson "Mastering WordPerfect 5.1 & Windows" citation has not been considered. All other references have been considered as noted.

Drawings

3. The drawings were received on 15 November 2004. These drawings are approved.

Election/Restrictions

Art Unit: 2614

4. Applicant's election of 13-15 in the reply filed on 15 November 2004 is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

5. This application is in condition for allowance except for the presence of claims 16 to 18 non-elected without traverse. Accordingly, claims 16 to 18 been cancelled.

Examiner's amendment

6. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 16 – 18 have been cancelled.

Allowable Subject Matter

7. Claims 13-15 are allowed.

8. The following is an examiner's statement of reasons for allowance:

The examiner concurs with the applicant that the art of record fails to particularly disclose or suggest the newly amended claim limitation where a "search continues as channel guide information is updated by the receipt of new channel guide information during said

search step” effectively allowing the user to establish a ongoing reminder for television programs meeting the search criteria.

As to the art of record, the Hoarty reference generally discloses a method for searching for program guide information of interest wherein the user is operable to be alerted to the presence of other programming at a future date meeting the criteria. While the reference states that it is operable to notify a user as to future events meeting the search criteria, it is unclear if the future notification of other events associated with matching the search criteria necessarily occurs as channel guide information is updated. For example, as shown in Figures 25-26, the user designated recording/reminder for a program on June 24 and subsequently indicates a desire to be notified of other Bogart movies. It is unclear, however, from the disclosure that the user is actually being reminded of any future programs over and beyond those occurring on either June 25 or June 26th which were originally retrieved as matching the search criteria such that the search is on-going while program guide data is being updated so as to notify the user of additional occurrences. For example, it is unclear if a user would be notified of additional programs meeting the search criteria beyond June 26th without manually re-executing the search. The Ferguson and Yanagihara et al. references, of record, provide evidence that it is known to schedule and/or automatically execute continual searches so as to automatically alert the user as to information of interest. However, the particular usage of the automatic alerting in the Ferguson and Yanagihara et al. references is solely taught in relationship to documents (ex. publications, press releases, newspaper articles, etc.). Therefore, the references do not appear to be in the field of applicant’s endeavor or reasonably pertinent to the problem with which the applicant was concerned;

namely an apparatus for scheduling the selection of a television program for watching or recording as identified in the instant application (IA: Page 1, Lines 9-11). Furthermore, the references provide no teaching or suggestion to apply the non-analogous art to an interactive television distribution system such as that employed by Hoarty.

As to other art of record, it is noted that the Schein et al. reference appears to teach the claimed limitation, however, the earlier filing for which priority is claimed and is needed to antecedent the valid priority claim of the instant application does not provide adequate support for the usage of on-going searches. Accordingly, the Schein et al. reference does not qualify as prior art under 35 U.S.C. 102 to be used against the instant application. Similarly, the previously cited, Robarts et al. reference teaches the claimed limitation, but it also does not qualify as prior art under 35 U.S.C. 102 against the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
